

DEPARTMENT OF PUBLIC WORKS,  
Michael A. Fowler, P.E., Director

N09-01  
NOTICE OF MEETING

An informational meeting is scheduled for Tuesday, February 10, 7pm at the Derry Municipal Center, 3<sup>rd</sup> Floor, 14 Manning Street to review preliminary construction plans for the Florence Street bridge.

The Town of Derry has retained Hoyle, Tanner & Associates to prepare a design to reconstruct the Florence Street Bridge. Preliminary survey and geotechnical work was conducted last year. At this stage, a preliminary design has been submitted with a recommendation to raise the bridge elevation by approximately one foot higher than the current elevation. Raising the bridge elevation will assist in reducing the number of times the bridge is closed due to flooding. Raising the bridge elevation will also impact the approaches and require reconstruction of driveways for residences closest to the bridge.

The Town of Derry will be seeking a Wetland Permit and complete the design by July 2009 with possible construction later this year. Questions can be directed to Michael Fowler, 603-432-6144 in advance of this meeting.
